

## **Disclosure of Commercial Interest Policy**

Consistent with its mission statement, the National Foundation for Celiac Awareness (NFCA) has developed, and provides, continuing education (CE) programs about celiac disease as part of its efforts to raise awareness and drive the diagnosis of this common disorder. NFCA is dedicated to providing fair, impartial and comprehensive educational materials in its CE programs that are free from commercial influence.

NFCA recognizes that commercial support has the potential to influence the outcome of aforesaid activities. This activity is for scientific and educational purposes only and will not promote any specific proprietary business interest of the commercial interest. If there is a commercial interest, the commercial interest will not influence the content of the educational material. All educational programming will be based upon scientifically sound, peer-reviewed research that is objective and balanced. The commercial interest will not require NFCA to accept advice or services concerning teachers, authors or participants or other education matters, including content, as conditions of receiving its support.

NFCA will disclose to its learners all sources of support or commercial interests that may be perceived as impacting its educational programming. The disclosure will include any and all commercial support to the NFCA, its employees, contractors and speakers. This disclosure will be included on promotional material, brochures and other activity material for the CE program. The method of disclosure may include the logo or slogan of the commercial interest.

There will be no product promotion or advertisement during the CME educational activity.

Please contact Nancy Ginter, NFCA's Director of Operations, with any additional questions:
